How music influences personality

724 Words • 2 Pages

Recommended: [Musics Effect On Popculture](#)

A great amount of people listens to music which sometimes influences their life. Some of them listen to music in order to relax but there are people who create their lifestyle owing to the music they love. Of course there are many other reasons why music is listened to. All reasons cannot be so easily written down since all people are different and the reasons for the choice of their favourite genre of music are different as well. People can listen to music in order to sleep better, to laugh, to cry, to be happy, to dance etc. When music is played in a shop people are likely to buy more than if there was silence. Music and personality are connected.

People have been influenced by music for a long time. Songs were sung in the past already when there were simpler instruments than nowadays. “We have no rich evidence of music from the Prehistoric Period. There were found only fragments of musical instruments from the Stone Age and it is approximately 600 000 BC” (Cmíral 188, as translated by Tereza Dvořáková). As it can be seen nowadays music have remained an important part of mankind. People are brought to the mood they want to be in. Music helps to feel what a person wishes to feel, and therefore there is a great amount of genres of music for people with all possible personalities.

We are going to discuss one example of behaviour of people who enjoy pop music which is modern music with hits that are usually played on the radio and at a disco. “Pop music lovers are hard-working and have high self-esteem, researchers suggest that they tend to be less creative and more uneasy” (Cherry). A person who is hard-working probably uses pop music to release the...

...people have their own style based on music which affects their whole life and other people only use music for their enjoyment, relax and other reasons but it does not influence them so much. Creating new songs, listening to them, singing and everything that is connected to music have had a strong impact on people. When listening to music it takes

is very loud, often evokes strong emotions. Music will probably be a part of people's life a long time as it has been until now.

Correlation Between Personality and Music Preferences

1092 Words | 3 Pages

Not every person is going to have the same taste in music, but why is it that people find a certain genre more appealing than others? A person's personality and individuality clearly has a large role. Research indicates that there is a definite correlation between personality and music preferences (Rentfrow & Gosling p. 1236-1237, Chamorro-Premuzic & Furnham p. 180-183). Those that enthusiastically chose to involve music in their lives will be more open to whatever

How Music Affects Us?

1751 Words | 4 Pages

There are many ways in which music affects and surrounds us. It is our creative outlet, our passion, our distraction, our night out or simply our moment of relaxation. Throughout the centuries, music has played a vital role in our lives. We as a society immerse ourselves in music day to day. From grandiose social gatherings and dances in the Middle Ages, to live concerts and monumental performances to date. Music is in films to elicit emotion and in television commercials to make us consumers of the newest technology. More importantly, it is in our preferred listening device because we choose the particular songs and artists we like and want to hear. The Marriam-Webster dictionary defines music as “sounds that are sung by voices or played on musical instruments; the art or skill of creating or performing music.” But why do we choose attend the Bruce Springsteen concert at Wrigley Field and not the Chicago Symphony Orchestra? What makes us enjoy one type of
