Jazz and Political Connections

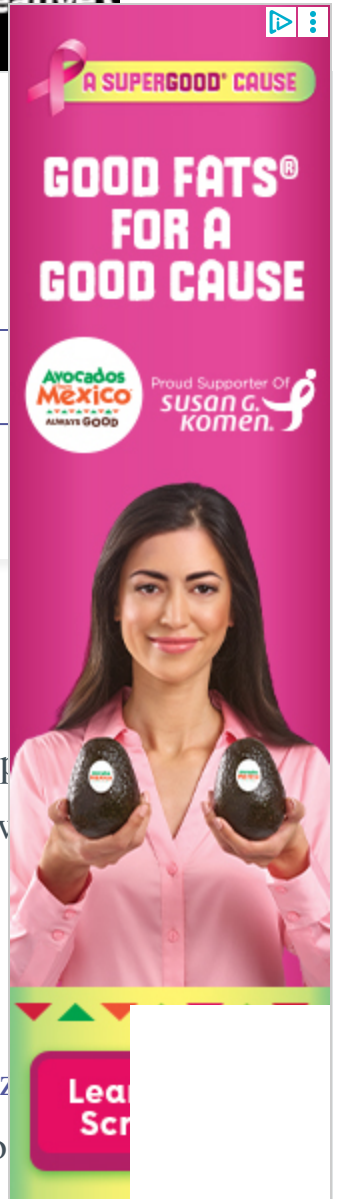

1028 Words • 3 Pages

Recommended: [The Emergence Of Jazz](#)

Jazz has been a genre we have been studying over these past couple of weeks. During these weeks I have acquired new knowledge that has interested me in this genre. I never viewed jazz as being a political style of music nor did I know that there were songs that contained political messages. Finding out about these different songs and jazz having some aspect of political style to it intrigued me to write about this genre.

Throughout the many artists and songs we have study on this genre there have been a few ways jazz has incorporated

musicians have incorporated political styles into their music. For example racism has been a big issue in history in the past and have affected many African-Americans lives. Billie Holiday was able to bring out this tragic enslavement of African-Americans and describe how they were treated back in the 20's. Strange Fruit, a poem by [Abel Meeropol](#), which was later picked up by Billie Holiday and formed into a song is one way jazz has incorporated into political discourse. This song describes the [lynching](#) of African-Americans in the south and a protest against the inhumanity of racism. Billie Holiday singing this song and introducing this type of musical lyrics to her audience brings about the political issue of racism and the inhumane treatment they endured. She was able to inform people of what really happened to African-Americans back in the day and is able to tell the story of what many African-Americans had to endure. When racism is discussed it's just a brief overview of whites and blacks being segregated. It really does not go into detail of the beatings and punishments they encountered. S...

informative and enhance the musical by telling a story. I believe giving the music a political subject enhanced the musical style because the music can illustrate a narrative or tell a story, encourage a certain emotional reaction in the audience, and even communicate something that is not being shown.

I enjoyed learning about jazz because it brings about different emotions when you listen to it and I enjoyed the

The Impact Of Louis Armstrong's Influence On American History

1133 Words | 3 Pages

“His relaxed phrasing was a major change from the staccato style of the early 20’s and helped to set the stage for the Swing Era” (“Life & Legacy”). And as such a prominent artist, and in particular, jazz artist, Armstrong did not only change the perception of jazz and swing, but the views on African Americans and their culture. Armstrong and the Harlem Renaissance reflected black history and culture, and it became popular, even in white communities and clubs. Jazz as a whole genre helped further society’s views through the universal language of music, where any ethnicity could

Music is magical: it soothes you when you are upset and cheers you up when you are down. To me, it is a communication with souls. I listen to different genres of music. When appreciating each form of music, with its unique rhythm and melody, I expect to differentiate each other by the feelings and emotions that it brings to me. However, I would definitely never call myself “a fan of jazz” until I witnessed Cécile McLorin Salvant’s performance last

Jazz was positive music, with uplifting sounds and relatable lyrics. People who listened to it could relate to the words being sung and felt happier afterwards. The other side of the debate, though, felt as though the music was bringing on a new era, one that they were not comfortable with.

Understandably so, because change is never easy. This group of people were "fearful of such rapid change and nostalgic for the small-town America" that they had once known.

They had become used to quiet, conservative times, which were now changing due to the "noise" we call jazz. There is reason enough to not want to change, but to have such a negative outlook on a new life is never the answer. Change is
