Different Genres Of Metal Music

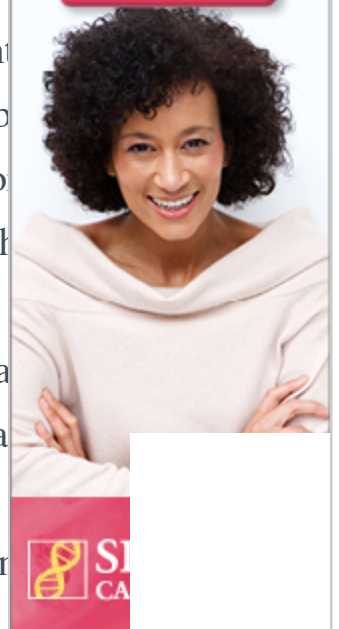

651 Words • 2 Pages

The term genre in music can be used to describe different forms and styles of music all over the world, whether it be country, rock, jazz, pop, and so on. But the terms used for genres can be considered broad and/or vague, so music that is commonly classified in any given genre can be categorized more specifically. For example, jazz can be a broad term for other subgenres such as Cool jazz, Free jazz, Dixieland, Ragtime and numerous other examples. This general rule applies to many different genres of music, and metal music is no exception.

On first instinct, it does sound very ironic and unusual for a heavy metal band to sing a love song when a typical heavy

Since the audience for thrash metal is relatively small compared to the audiences of music such as pop, it is not very likely that a metal band would make as much money as someone who wrote and/or performed more popular music. Metallica decided that they wanted to avoid becoming what many would consider as a "struggling band" by trying to expand their audiences by composing different musical ideas to move away from attracting only metal enthusiasts. With a bigger audience, Metallica would make more money.

In a way, it sounds hypocritical for Metallica to sue its fans when they avoided becoming corporatized for a long time.

The satanic cult panic in part contributed to the conviction of Misskelley, Echols and Baldwin. Baldwin himself describes this assumption; “I can see where they might think I was in a cult,” he said, in that 1993 interview, “because I wear Metallica T-shirts.” (Rich, 2013). The article goes on to explain that the crime happened at the end of the five-year satanic panic period that had plagued American popular culture. Violence In Rap Music

1262 Words | 3 Pages

This violent theme continues to be prevalent within rap music because just recently have white capitalists overtaken ownership of many of these artist's recording labels, thus selfishly dictating how the music must be portrayed in order to produce revenue. Within this rhythmic poetry, artists will assume hyper-masculine roles in demands of a respected reputation and an attempt to disrupt peace solidified and enjoyed by the racially privileged. This only reinforces and attempts to justify institutional interventions, such as racial policing, police brutality, and high incarceration rates, in which Rebollo Gil and Moras refer to as "hip hop in crisis" (2012, pg. 120). Today, rap music continues these same narratives, while other musical genres, such as heavy metal group, Metallica, have also become more active in describing violence through song lyrics, although they experience far less criticism and branding from audiences when doing so. There is an assumed exception among white

...to be contradictions on the subject, as well as opinions on when does an alternative rock group stop being or becomes “alternative rock music”? Is it defined by the sound of the music, the image of the group, or both? One can also ask if it’s about the era or time the group existed, just like the genre term of classic rock. Bands such as Led Zeppelin, The Who, or Pink Floyd weren’t classified as classic rock music when they were forming and popular during their prime. What really defeats the purpose of the common definition of alternative rock music is during the early 1990’s when
