Exploring Trendy Underground Music Genres

855 Words • 2 Pages

Have you ever wondered how other genres of music started? Although every style has its own unique sound, they're somehow related in a small way. As a musician you may want to incorporate their style of playing and tweak it to make it personal and your own. However, there are hundreds of different genres to choose from I've decided to choose a select few that I've found appealing to me.

Math rock is a rhythmically complex, guitar-based style of experimental rock music that became known in the late 1980's. It is distinguished by complex, atypical rhythmic structures including irregular stopping and starting, sharp

groups have a tendency to stick out more often than in other groups. It is typical to find guitarists in math rock groups make use of the tapping method of guitar playing, making for an unusual sound. Loop pedals are occasionally incorporated to create a machine-like effect, such as in the group Battles. Guitars are also often played in clean tones rather than in other upbeat rock songs.

It is very common for rock bands to use a basic 4/4 meter. However, math rock frequently uses irregular time signatures such as 7/8, 11/8, or 13/8, or constantly changing meters of 2 and 3. These complicated rhythms are viewed as using mathematics to figure out their music, hence their name. Math rock comes from other rock genres, such as rock, heavy metal, progressive rock and punk rock.

Math rock became well known in the late 1980's underground music scene at shows and bars. Older bands have characteristics of both math rock and post-rock, using instruments for textures rather than...

... middle of paper ...

...ence had taken a toll on many musicians' performances creating heavier, harsher sounding music. In the early years numerous musicians turned to mushrooms for inspiration for their lyrics. In the 1970's many of the musicians and bands decided to move on and create progressive rock.

recent years the psychedelic rock sound has been heavily influenced by electronic and orchestral influences.

Though I have only listed a few genres they expand into multiple other styles of music. Musicians are inspired by

1960s and Rock 'N' Roll

558 Words | 2 Pages

What emerged after the explosion of rock and roll in the 1950s abandoned the roll and has now come to be known just as classic rock. This rock that was created following the decade of The King became a completely unique and different sound that changed the musical landscape and what was once a single, unified genre gave way for multitudes of variation in its sounds. These new sounds, that came mostly

The Influence Of African-American Rock N Roll

1376 Words | 3 Pages

Now music and life are bound up with each other, enough to be called an inextricable connection. Music has been developed by following the human society, and its developmental steps are very similar to the growth of ideology. For example, one concept became a major of society, and then another concept tried to be against the major. In other words, music has many different genres

The repetitive piano chords, light maraca rhythms and counter melodic backing vocals are comparable to 1960's pop music (particularly that of The Beatles, The Beach Boys and The Ronettes). Furthermore; the fluctuating drum beats, rhythmic bass and electric guitar melodies and falsetto lead vocals may seem similar to psychedelic rock music of the late 1960's and early 1970's (particularly that of Led Zeppelin and The Jimi Hendrix Experience). Although Tame

Much like the instrumental music of jazz, the electric guitar had a unique human like vocal quality, and lent to the powerful sound of rock music. This sound, paired with its volume capabilities helped guitar virtuosos like Jimi Hendrix

musicians could effectively reach their audiences through technology was radio and television. Just as recording technology was crucial to the spread of jazz in the 1920s, the advertisement of songs through repetitive radio plays and music videos on MTV helped to solidify rock in the minds of the youth as something fresh and new. While there was a

Rock-N-Roll Music

709 Words | 2 Pages

Aptly named the Rock & Roll Generation, the 1950's saw the birth and rise to prominence of rock-n-roll and rockabilly (an early style of rock-n-roll). However, this musical revolution would never have been possible without the invention of the electric guitar by Les Paul in 1952 (1). The solid-body electric guitar produced a distinct sound unlike any other instrument during that time; as a result, it was this unique sound that rock-n-roll music developed its entire foundation upon. Today, Les Paul's guitar (now owned by the popular guitar company Gibson) remains one of the most

Drugs and Rock and Roll

643 Words | 2 Pages

Beginning with the late 1960's counterculture in San Francisco, music and drugs will forever be inter-linked. Hippie bands such as the Grateful Dead, the Allman Brothers, and Phish are associated with marijuana, mushrooms, and LSD. Modern electronic "rave", or club music is associated with MDMA or Ecstasy. When one thinks of rock and roll, sex and drugs immediately come to mind. While the use of drugs is not essential for the creation or performance of all new music, it was certainly an important factor for the counterculture music of the late 1960's. While some of the most important and influential music was made with the help of psychoactive drugs, it was

What Defines Alternative Rock

818 Words | 2 Pages

Rock music is a term that should be familiar. Originally dubbed “rock and roll” in the 1940’s and 1950’s, rock and roll is almost always fronted by an electrical guitar and heavily influenced by blues, R&B, and even country music. By the late 1960’s and early 1970’s rock and roll began to be shortened to just “rock music”, and the entire style starting

genre in question however is Alternative Rock, which is generally defined as despite following the fundamentals of rock music, it strays away from what is considered

Music and Math

876 Words | 2 Pages

Music and mathematics are incredible forms of art that have been apart of every day life for centuries and continue to do so. It seems that most people would not consider mathematics to fall under the category of art because generally the stereotypical thoughts of math consist of numbers and equations. However, art is defined as the expression or application of human creative skill and
