Music Genre Analysis

Words • 2 Pages

Recommended: [Popular Culture Influence On Music](#)

Music genre is a category of pieces of music that share a common style or “basic musical language” (van der Merwe 1999, p.3). The two articles that I will be comparing are “Pop Music: Genres, Subgenres, Sub-Subgenres and More” by Andrew McLeod (2001) and “On the Value of Popular Music” by S. Firth (1996). Categorizing music is especially challenging when it comes to fitting it into sub genres. As

we move through the ages, and technology and communication becomes more complex, newer and unique genres are emerging. At first glance the more specific subgenres cause dispute and thoughts of “hipster” emerge

two articles that I will be comparing have different levels of exaggeration, meaning and purpose. Nonetheless, both tackle the issues in relation to **genre** and its ideology.

The title “Performing Rites: On The value of Popular Music – Genre Rules” is itself, an interesting concept by Firth. It is suggesting Performance is a religious act and popular music should be viewed with caution as to it’s worth in being listed as popular. Firth S. (1996) classifies how genre is created as a result of historical and social circumstances met inevitably through industrialization. Circumstances include making, selling and consuming; that in turn get categorized in order for consumption. This to me sheds light on how the problem is that market success corresponds to popularity therefore it deems cultural importance falling heavily in terms of countering critical judgement.

Firth identifies there are sociological forces present in genre making. He uses Rock FM as an example, classifying rock as “other than pop, album based music for adults”...

...s, Subgenres, Sub-Subgenres and More have a more

also given such as history on how Electric genre formed etc. Therefore, I would conclude that the latter was a more thought provoking article.

Both articles have different purposes yet tackle the same ideology, which is genre. It is understood from analysis of them that we are slowly loosening ties on what a genre is and becoming a much wider concept. We assume that success means cultural importance however they are not a

...ath to dominate their field and branch off into other dominating sub-genres. Those genres, especially in the

decades were accompanied by entertaining dance and shows that provided the people with a comfortable diversion from their outward life. In addition, music remained a way of spiritual and fun release of the mind and energy. With the radio acting as a distribution center for music, it became a national pastime in which it still ranks number one today for its easy access and reaching fields. In conclusion, although

Rock 'n' roll and 20th Century Culture According to Philip Ennis, rock 'n' roll emerged from the convergence of social transformations which resulted from World War II (Ryan 927). Despite its pop culture origins, rock music is arguably one of the strongest cultural factors to develop in this century. Artists such as Lennon, McCartney and Dylan defined the emotions of a generation and, in the last decade,

Most things have their beginnings in something small: a word, a breath, or idea; but not music. Music begins with a single vibration. It explodes and carries on, morphing worlds of unrelated personas. It lives rampantly in the mouths of millions of unruly and free-spirited teenagers, like a fever.

After a rough day, when people come home from work, they need something that will make their day better. Any music helps to release people from their everyday lives. For some it is like going on vacation, or a home away from home. It not only gives strength, hope, but it helps relieve stress. Music is essential to everyday life in this world. People have become what they listen to. “The most important requirement of popular music is that it must appeal to a large number of people” (Yudkin 284). Pop country music is one

Folk Music: All Soul

934 Words | 2 Pages

In this day and age, pop music dominates the airwaves at every turn. Katy Perry, Lady Gaga, Kanye West, and many are commonplace names among teenagers and younger demographics not only in the United States, but all around the world. The United States has accepted the position of international, cultural role model long ago, dating back to the 1950's when rock and roll caught fire as a hybrid of blues, country, and jazz and spread to the rest of the world almost infectiously. Since then, every major artist that comes out of the United States has easily become a global icon, regardless of the language or nationality of their adoring fans. However, one could conceive that this glamorized version of music comes less from the soul of the artist and is merely born of fiscal ambitions and visions of grandeur. The point made previously is not to critique any pop icon's

Mittell's Television Genre Theory and Louie

2311 Words | 5 Pages

Originally published in Cinema Journal 40, No. 3, Spring 2001, Jason Mittell's "A Cultural Approach to Television Genre Theory" conceives of television genre as a cultural category rather than merely a textual component. In the decade since the original publishing of the article, television has evolved out of the multi-channel era and into the post-network era. In this new television landscape, genres are no longer a fixed entity¹, and there is great academic potential

Essay On Hip Hop As A Subculture

1844 Words | 4 Pages

In today's world, music is played just about everywhere around the world. There is not many days that go by that you don't hear some type of music. Those music's can be broken down into their own sub categories and with that they can become into a subculture that people belong to or just claim to be a part of. To explain it more a subculture is defined as a cultural group within a culture, that often has beliefs or interest that is apart from those of the main culture itself. Subcultures are often made so that those who are actively participating within them can be set apart from those of other
